Mar 12, 2019 Stealth Injector allows you to inject your own script at any time. It will inject before the code starts to run so that you can "close on inject", or after the code has started to run so that you can "close on inject". You can also inject any time in the game, and it will automatically close itself after 5 seconds. This prevents the opponent from detecting your code. Stealth Injector has several settings: Auto Injection: The script will find the best time to inject, by checking the time. Auto. Injection Delay: The delay between auto-injections. Stealth Injection: The script will inject as the player is starting to run. Stealth Injection Delay: The delay between stealth injections. Close On Inject: The script will close the program when it injects the code. Stealth Injector is the easy-to-

use, stealthy, cheat code injection for Total War: WARHAMMER. Automatically inject when you start the game: Inject the script just before the game starts to load: The script will inject after 5 seconds, but will automatically close itself after
